**Note 1:** Smoke Detection means there are smoke detectors in every bedroom, hallway and common area.

**Note 2:** Fire Alarm Systems are monitored 24 hours a day/ 365 days a year. Addressable fire alarm systems monitor each device in the system as a point address. That means each smoke detector, pull station, etc. has a separate address (location) that can be displayed on the main fire alarm panel. Zone fire alarm systems monitor devices in the system as parts of zones covering areas of the building (e.g. second floor, basement, etc...).

**Note 3:** Hood suppression systems are fire extinguishment systems installed in the stove ventilation hood that will extinguish a fire and sound the general fire alarm when discharged.
